Newlands was the first to organize the elements and show that properties repeated in a periodic way ... The Periodic Table and Periodic Law The Periodic Table and ... The rows of the periodic table are called periods, while the columns of the table are called groups. Elements in the same period share the same highest ground state electron energy level. Elements in the same group have the same number of valence electrons. 2. Periodic Table Quiz - thoughtco.com SHORT ANSWER 11. ANS: Mendeleev knew their relative masses and properties. PTS: 1 12. ANS: Mendeleev placed elements in the groups where they logically belonged based on their properties. PTS: 1 13. ANS: The table is called a periodic table because the properties of the elements repeat at regular intervals from row to row. PTS: 1 14. ANS: Chapter 5 Assessment - Somerset Academy At the end of this periodic table and reactivity lesson plan, students will be able to identify that valence electrons determine an atom's chemical properties, including reactivity and interpret the arrangement of the periodic table to explain how properties are used to classify elements (including groups and periods).
